

Looking for a rugged, fully sealed rocker switch?

Carling Technologies set the standard for performance, reliability and aesthetics with the widely successful, often imitated, but never duplicated, V-Series rocker switches. Building further upon that platform, Carling has once again raised the bar with the fully sealed W-Series. The W-Series traditional appearance features complete IP68 protection, even below the panel, where the critical connection is made from your wiring harness. When used in conjunction with the integrated connector, the totally submersible W-Series provides a seal for up to ten individual wires, assuring compatibility with even the most complex circuitry.

The W-Series also offers a wide variety of accoutrements including endless illumination options featuring dual level and multicolor LEDs, progressive and hazard warning circuits, ratings up to 10A 24V, choice of paddle, rocker, locking or laser etched actuators, hundreds of standard legend choices and the electrical performance and reliability that is the hallmark of Carling Technologies products.

Tri-Seal Design

Affords IP68 protection for the entire switch including terminals and connector

Connector with Twin Locking Tabs

Provides sealed water tight connections as well as simple removal using only your hands.

An Easy Retrofit

W-Series fits industry standard mounting hole 1.450 x .830

Functionality Under Extreme Conditions

Roller pin mechanism is lubricant free, withstanding temperatures from -40°C to +85°C.

Proven Switch Mechanism

Butt-Action contacts are available in a wide variety of circuitry and platings to accommodate most any application.

Electrical

Mounting Specifications

Panel Thickness Range .032 to .125

For optimum panel fit, the following panel thicknesses are suggested: .032, .062, .093, .125

Dimensional Specifications: in. [mm]

WCH CONNECTOR
(190-31214-001)

Notes:

WCH connector is intended for use with Tyco/Amp .110 Junior Power Timer, female contacts, and wire seals.

For 14-16 awg wire, specify Tyco/Amp P/N 927766-3

For 16-20 awg wire, specify Tyco/Amp P/N 927770-3

Tyco/Amp cable seal P/N 828904-1 (20-18 awg wire) or P/N 828905-1 (16-14 awg wire) is required for each individual wire lead, and Tyco/Amp cable plug, P/N 828922-1, is required to seal each unused connector opening. Consult Tyco/Amp for the cable seal recommended for your specific wire gauge and thickness.
